

Free University of Bozen

Exams

Scans of some [past exams](#) are available for download. Due to privacy concerns, you need to have a valid, confirmed account to this Wiki.

Lecture notes

Until I finally get around to sort out this mess, maybe you'll also want to consult the [Aleturo Teaching](#) homepage as well, especially the [table of contents](#) there.

- [Business Information Systems](#)
- [Analysis](#)
- [Compilers](#)
- [Computational Linguistics](#)
- [Computer Systems Architecture](#)
- [Distributed Systems](#)
- [Functional & Logic Programming Languages](#)
- [Introduction to Artificial Intelligence](#)
- [Introduction to Databases](#)
- [Introduction to Programming](#)
- [Operating Systems](#)
- [Presentation & Communication](#)
- [Probability Theory & Statistics](#)
- [Project Management](#)
- [Software Engineering Project](#)

Some pages are protected and are only accessible with a valid account on this Wiki. You will know whom to ask to get one.
